Just \$ 550.00 & \$ 1.00 / Wrist Tag , Plus SHIPPING.

Sling Reader 10  
feet of range

Spire  
Reader  
20 feet of  
range

Now, you can quickly and easily "lap count" your Walk-a-Thon fund raiser using the Orbiter RFID Lap Counter. Here is how it works: First, turn the machine "on". Next, know who you gave the bibs to. Then, make the machine beep as students cross the detection line without stopping or lining up. They run free and have more fun. Orbiter is here to provide complete instructions as hundreds of PTA / PTO events are done each year.

The Orbiter beeps in real time as Students pass. Lap Count are accurately accounted for all students and shown by teacher, grade, class and gender. The system is versatile and can be set up multiple ways. Results in real time or push of a button for printed reports. This makes your event day easy.

You will receive the rental unit three days prior to your event with everything you need: (Chipped wrist tags, Laptop Computer, and the Orbiter reader). We will practice with you for 45 minutes with three practice events to help you get ready for your race day.

Then, on event day we are available on the phone to assist with any questions that may arise. Call us today to rent your Orbiter!
